NEW DELHI-110011

MESSAGE

I am happy to learn that Plastics and Linoleums Export Promotion Council is holding its Export Awards Function in Bombay on December 11, 1991.

Inspite of the huge domestic demand for plastics, exports of plastics and allied items have been going up substantially. This is commendable. Our effort is to give a major thrust to exports in all the key sectors by creating an environment that is free from controls, and conducive to promotion of global competitiveness. Recent reforms in the trade, industrial and fiscal policies are a major step forward in the direction of liberalisation and deregulation of the economy. I am sure the exporters of plastics and linoleums will take full advantage of the new policies and increase exports to significantly higher levels in the years to come.

I congratulate the award winners and wish the council all success.

P. V. Narasimham

28th Nov. 1991

I am glad to know that the Top Exporters' Award Function will be held in Bombay under the auspices of the Plastics and Linoleums Exports Promotion Council, on December 11, 1991.

It is heartening to note that of late, the Indian Plastics and Linoleums goods are being exported on an increasing scale, thanks to the modern technology being adopted by the industry. However, let us not be complacent. We have to update our technology and keep pace with the modern technical advancement. It is therefore, essential to pay attention to manufacture quality goods and ensure application of cost-effective methods of production.

I congratulate the recipients of the coveted awards and wish the function all success.

2 December 1991

MESSAGE

I am glad to learn that Plastics and Linoleums Export Promotion Council will be organising its Top Exporters' Award function in Bombay on 11th December 1991. Exports of plastic and linoleum products have shown substantial growth in past few years despite various constraints and severe competition outside.

The potential to be tapped in this sector is enormous and with determined efforts our exporters can achieve much higher growth. This will call for modernisation and upgradation of the existing units for ensuring supply; of quality products to the international market. The new trade policy measures announced by the Government would help our exporters to move ahead with great confidence for taking up fresh challenges.

I send my best wishes to the award winners and I wish the Council and all its members a successful exporting year.

MESSAGE

I am glad to note that The Plastic & Linoleums Export Promotion Council is organising the Top Exporters' Award Function in Bombay to facilitate the top exporters in the field of plastics and plastic products. It is a matter of satisfaction that the exporters of plastic products are contributing their mite to earn precious foreign exchange for the country. On the occasion of the award function I convey my heartiest greetings to the award winning top exporters and also those who are striving hard in the field of exports.

11th November, 1991

MESSAGE

I am happy to learn that Plastics and Linoleums Export Promotion Council (Plexoconcil) is holding its Top Exporters' Award Function at Bombay.

It is gratifying to note that despite the difficulties faced by the Industry, Plexoconcil has been able to make a substantial breakthrough in exports. This is indeed a commendable performance.

Plastics and Linoleums products offer excellent export potential for the future and India is well placed to occupy important niche in the world markets. However, fully exploitation of this potential will only be possible if our industry continues to pay attention to modernisation and aims at continuous quality improvements so that our products can effectively compete in international markets. The recent initiatives in trade policy should help the industry to achieve higher goals of exports. Plexoconcil has an important role to play in promoting the exports at this crucial stage.

I congratulate the Award Winners and wish the Council and its members a successful exporting year.

WELCOME ADDRESS BY
SHRI K. P. GUPTA, CHAIRMAN,
AT THE COUNCIL'S
16TH TOP EXPORT AWARD FUNCTION
ON 11TH DECEMBER, 1991
AT BOMBAY.

Hon'ble Shri Chidambaramji, Government Officials,
Dignitaries, Award Winners, Ladies and Gentlemen :

It gives me great pleasure to be in the midst of stalwarts of
the Plastic Industry, who had contributed in a big way in reaching
new heights in exports.

At the first instance, I would like to congratulate the Top &
Second Best Exporters of various Product Groups under Plastics
for the years 1989-90 and 1990-91. It is true that their efforts had
contributed to the growth in our exports in those years. I wish them
better performance in the coming years also and would suggest to
them to expand their production base and make their products
more competitive in the international market.

Friends, this is the 16th AWARD FUNCTION of the Council,
and on each occasion, we had the opportunity to invite dignitaries
at whose hands the Awards were distributed.

And now, we are very much grateful to the young and
dynamic Commerce Minister, Shri P. Chidambaram, who had been
kind enough to accept our invitation inspite of his busy schedule.

Shri Chidambaram, studied from Harvard University, is not
only a great Scholar, but also a legal luminary. He is very swift,
bold and very clear in his approach. He has taken over as a
Minister of State for Commerce at a crucial time when the country
is facing lot of economic and Foreign Exchange problems. Inevita-

I had the pleasure of having a meeting with him in Bombay
exclusively with our members wherein he responded to our
suggestions favourably. So, it is our good fortune that he is with us
to-day again.

Sir, I would like to brief about the Plastic Industry in India, as
it exists.

Plastic Industry in India is nearly 5 decades old and it is still in
the developing stage compared to developed countries. The
Industry is growing constantly keeping in pace with the domestic
demand. The Per-Capita consumption of Plastics is less than half a
kilo compared to 10 to 15 kilos of any developed country.

The production of raw materials has been very limited from
the beginning and for some reason or other, additional capacities
were not approved till recently.

The gap between the demand and the availability of raw
materials has been in the order of 45% to 50% and this gap is met
by imports. The Customs Duty on Plastic Raw materials range from
150 to 264%. Inspite of high rate of Customs Duty the Industry has
been regularly importing to meet the demands. The domestic
market is very much remunerative and this statement is judged by
the fact that more than 20,000 units are in production.

Plastics has definitely replaced a number of conventional
metals like Aluminium, Brass, Steel for various applications.

As far as exports are concerned, the exports of Plastic
Products were only nominal in mid-fifties and got stagnated
between Rs. 65 to Rs. 75 Crores in the late-eighties. The year
1988-89 saw a big leap in the exports achieving Rs. 128 crores
during that year from Rs. 64 in the earlier year. Both in 1989-90 &
1990-91, there has been an appreciable growth in exports, i.e. from
Rs. 128 crores to Rs. 179 crores to Rs. 204 crores.

Sir, in the past, we had been exporting conventional plastic
items to Middle East and African countries. In the last 3 to 4 years,
we had diversified the product range. It has been noticed with some
satisfaction that a big share of our exports around 70% is made by
both large and small scale units who have adequate infrastructure
and suitable machinery.

You may be aware, Sir, the major problem confronting our exports is the non-availability of raw materials at reasonable prices. According to an estimate, the total requirement of various Plastic Raw Materials based on last year's performance is about 50,000 Metric Tonnes for export production, consisting of :

- a) Polyethylene
- b) Polypropylene
- c) PVC Resin
- d) Polystyrene
- e) Engineering Plastics, namely ABS, SAN, PTFE, Nylon, Polyacetal etc. etc.

Although the largest share of this quantity is being imported under Duty Free Advance Licences, the problem is for small exporters.

I am happy to inform you that although IPCL are supplying their polymers almost at International prices to Small Scale exporters for export production who can not avail the benefit of DEEC, but I regret, inspite of our repeated request other Polymer producers have not come forward for similar facility. In this connection I have also moved the Ministry of Petroleum and Chemicals and suggested to them to arrange a tripartite meeting with the raw material producers, Ministry officials and the representative of the Council to convince these producers about the importance of the export requirements.

In this connection, a meeting was held under the Chairmanship of Shri S. P. Bajpayee, Joint Secretary, Department of Chemicals & Petrochemicals on the 26th November, 1991, alongwith major producers of raw materials and also different associations connected with Plastics and our Council. The Meeting discussed at length the availability of Plastic Raw Materials in the following one or two years, and also meeting the requirement of raw materials for export production by these units.

The raw material manufacturers showed interest to supply raw materials in small quantities to small scale exporters against Surrender of Advance Licence, only Excise Duty Free, which will not in any case be international price. Further, the procedure for

In view of the post devaluation scenario followed with incompetiveness of our competitors, the Meeting considered necessary to have a direct interaction between the Industry and the Council to conduct a detailed market survey for specified markets and specified products in order to help the small scale exporters.

The re-introduction of Post Export Duty Free Licence (Appendix - 21 of erstwhile 1985-88 Import Policy) could be favourably considered since the small scale exporters are not in a position to avail the DEEC facility as the export orders were received piecemeal and the present rate of Duty Drawback do not compensate fully.

The scheme of Raw Material Bank as suggested by the Council and duly approved by the Government and which is operated by Indian Petrochemicals Corporation Limited could not be fully utilised because the system of procurement is mainly time consuming. By the time the tender is floated and the bids are received, the prices in the International Market fluctuate up and down and the exporter finds it uneconomical. I would, therefore, request Indian Petrochemicals Corporation Limited to import certain fixed quantities of major Thermoplastic Raw Materials and also Engineering Plastics for off-the-shelf-delivery to the exporters on surrender of Advance Licence at the International prices. This is the only way to help the exporters in getting the raw material for export production in time.

At the same time I would like to point out that the cost of imported Raw Materials used in the Plastic Industries had gone very high due to devaluation of Indian Rupee with cumulative effect of import duty also which is as high as 200%. The Hon'ble Finance Minister had recently announced to reduce the Customs and Excise Duty to bring down the cost of Raw Materials. I earnestly urge the Finance Ministry that the Plastic Industry also get the benefit of this reduction of duty.

It is felt that while exporter import the raw material against duty free Advance Licence they have to submit only the bond to the Customs in lieu of Import duty; but while they were buying the raw materials from the local producers after surrendering the Advance Licence they were asked to submit a Bank Guarantee for the equal amount of Excise duty which means the financial blockade. Since buying from the local sources save our Foreign Exchange the Advance Licence holders should be encouraged.

Sir, Moulds & Dies, are the backbone of the Plastic Industry and as you may be aware that after a lapse of time this was brought back to OGL. In the absence of a clear-cut Notification by the CCI&E there were a number of disputes between the Customs and the Licensing Authorities about the import of Moulds & Dies. I would, therefore, request you to arrange for the issue of a Notification to clear the doubts from the minds of all the actual users and the concerned Government Authorities.

Sir, in the last fiscal Budget special consideration was given to Leather Industry for reducing the Import Duty on PU Film for Lamination on Split Leather as well as on PU Resin inputs required for Leather Footwear Injection Moulding. It may be possible that the Leather Industry might have sought this concession in order to improve their export performance.

But, this measure has indirectly hurt the Plastic Processing Industry which has got the capabilities to manufacture PU Film by calendering processing and also resulted in drain of Foreign Exchange.

Today, the Plastic Industry has successfully carried out PU Coatings. These manufacturers who belong to the Plastic Processing Industry has remained at a disadvantage as they have to pay 150% Customs Duty on the basic raw materials followed by additional burden of Excise Duty on the finished products, i.e. both on Film and Coated items. It is, therefore, pleaded that the Ministry may rectify the anomaly so that the Plastic Processing Industry can survive and also give required services to leather industry to increase the exports. The present Customs Duty on PU Resin is 150%, while on PU Foil it is only 40%.

Sir, it is a fact that Plastic Products are of Low Value Addition, but more of volume. Because of this, the Freight payable is on volume basis which has been in the range of 25 to 30% of the FOB Cost and in certain cases even more, particularly for hollow items e.g. Pipes, Bottles, Jugs, etc. The practical difficulty is that since the orders are received piecemeal, we are unable to make regular projections for shipping space. As you are aware, the withdrawal of CCS which refunded a certain element of freight disadvantage and hence the total burden of freight is now fully on the shoulders of our exporters. We had been pleading with the

Sir, the uniform rate of 30% Exim Scrip is found inadequate for our Industry. In the case of Plastics, there are a number of products which are fabricated by hand like Gift and Novelty Items, Ladies hand Bags, Money Purses, Wallets, etc., Spectacle Frames, Fountain & Ball Point Pens, etc. I would, therefore, suggest to increase the Exim Scrip rate from 30% to 40% for all items under Plastics. This would also compensate the effect of loss of CCS to the exporters to a great extent.

Our contribution to RPA countries is around 25% to 30% of our exports. The value Addition of 233% for our items, like Decorative Laminates, Jute Based PVC Floor Covering etc. is too high. They also do not find export potential in GCA. The efforts of our members to diversify the markets are slowly giving dividends, but not to a great extent. Though, the exports to GCA countries are very important to us in the present context I do not want to neglect the Rupee Trade also for some of our items. I would like to suggest to you to consider bringing down the value Addition suitably, on case to case basis. I also suggest that adequate Trade Plan Provision with bilateral countries should be made for the year 1992 also.

In this connection, I wish to mention that in order to protect the decline in our FOB realisation from RPA countries, our Council had introduced Minimum Export Prices for products like Laminates, Jute Based floor covering, Cushioned Vinyl Floor covering, PVC Leather Cloth etc.

In the case of exports of Plastic Woven Sacks, the Council had also fixed Minimum Export Price for exports to West Europe, as there is a likelihood of imposition of Anti-Dumping Duty on Imports from India of this item. The Plastic Woven Sacks, is unfortunately, classified under the Textile Category because of its woven nature and therefore, subject to Quota System for exports to USA. I agree that any thing woven can be considered as Textiles, but all of them are not used for covering human body. These plastic sacks/fabric, though woven, are meant for packaging purpose only and should not therefore, be classified as a Textile item. I had already taken up the matter with your Ministry as well as the Ministry of Textiles to remove this item out of the quota restrictions or alternatively be given separate sub-quotational Quota etc.

your personal intervention to get this item removed from the category of Textiles, and thus open out opportunities for increasing our exports to USA where there is substantial demand for the same.

On the issue of Export Finance, I would like to state that the recent hike in the interest on both Pre-Shipment and Post-Shipment Credits would definitely hit our exporters. I also understand that because of the credit squeeze, Nationalised Banks are not coming forward to offer export finance. I appreciate the present economic position, but on behalf of the exporters, I have to plead before you for reduction in the rate of interest on export finance and granting of liberal credit facility.

I am very much perturbed to know that the MDA Assistance to the Export Promotion Councils is being reduced from next year onwards. I wish to point out that Export Promotion Councils have been playing a vital role in promoting our exports over the last 3 decades and gained skill, expertise and experience in providing information, identification of new products and other vital information to the exporting community. Before our Council came into existence in the mid fifties, export of plastic goods was worth around Rs. 7.5 lacs only. Due to our untiring efforts, exports have now reached a comfortable figure of Rs. 200 Crores. In addition roughly another Rs. 300 Crores are earned by indirect exports of plastic goods in the form of Packaging material, Video Cassettes, Audio Cassettes, Components and accessories used in various Engineering and other export items. In the present context of removal of regulations, decentralisation and simplification of procedures and formalities, Export promotion Councils, like ours, would spare more time to undertake various code activities for the benefit of the exporters and create a congenial atmosphere for increasing the exports. I would like to emphasise that this specific nature of work cannot be handled by any other agency, or individuals (Government or Private) except the Export Promotion Council alone. For its promotional work, the Council should be given 100% Grant and for Non-Code Activities, the existing ratio should continue for another period of 5 years. It is equally impossible to generate more revenue by increasing the subscription which has been resisted all through by the SSI Sector. It is not possible for our Council to levy any cess on exports in order to generate revenue.

hardly 0.25% of total exports of our Plastic Products, i.e. Rs. 200 Crores, which should not be treated as a Grant. It should be treated only as incidental expenses towards export promotional activity for the benefit of the industry.

Both the Task Force Recommendations and JIM recommendations have clearly revealed that Export Promotion Councils are the only Bodies that can be entrusted with the work of export promotion and further improvement in their services to the exporting community could be undertaken.

Sir, against our target of Rs. 260 Crores for the year 1991-92 the exports for the period April to September 1991 stood at Rs. 96 Crores recording a growth of 18% over the corresponding period of last year's performance. In Dollar terms, it will be 13.21%. The impact of devaluation and Policy changes announced subsequently would have its effect only in the remaining months of the current financial year, and I personally hope that we will achieve this target.

The Council has also planned to undertake the following export targets :

Year	Amount
1992-93	: Rs. 335 Crores
1993-94	: Rs. 400 Crores
1994-95	: Rs. 500 Crores

I am hopeful that with the easy availability of Plastic Raw Materials, after the commissioning of 2 big Petrochemical Complexes, the above Targets could be achieved with the continuous co-operation of the Government.

However, in order to sustain the present increasing trend of exports, I would like to suggest the following :

- (1) Reduction in the Value Addition from 33% to 20% :

Plastic products like Garbage/Refuse Bags, Shopping Bags, etc., do have adequate export potential in Western Europe, USA, Australia. With the devaluation of Indian Rupee,

The withdrawal of CCS has also affected the export pricing to a large extent. Hence, we suggest that the Value Addition for all Plastic products should be reduced from 33% to 20%.

- (2) Import of Secondhand Capital Goods should be allowed for export production at a reduced rate of Customs Duty, with suitable export obligation.

- (3) Import of re-cycled Plastic material :

Plastics can be reprocessed a number of times. However, the raw material manufacturers abroad have a quality which is neither virgin nor sub-standard, but much better than re-cycled material. If such raw materials are allowed for export production under Duty Free Licence, products like Films & Bags, Box Strappings, etc can be manufactured and competitively exported.

- (4) Dereservation of certain Plastic Products :

A number of plastic products like Plastic Bangles, Fountain Pens, Ball Point Pens, Imitation Jewellery, Electrical Accessories, Plastic Moulded & Extruded Goods, PVC Fabricated Goods, Spectacle Frames, Dolls, Toys & Games are specifically reserved for manufacture by SSI Sector. The Industry feels that when the volume of export business is quite large, the SSI units would not be able to cater to such big volume of exports. The reason being the SSI units do not have adequate working capital and Plant & Machinery as well as necessary infrastructure for international marketing. It is suggested that products like Polyethylene/PP Films & Bags, PVC Pipes & Fittings, Plastic Woven Sacks, Toys, etc., should be totally de-reserved for manufacture by SSI Sector for a specific period of time. Depending upon the growth in exports in the coming years, the De-reservation Policy as suggested above, may be reviewed.

- (5) Fixation of Input-Output Norms for all raw materials and also finished Plastic products for speedy issue of Advance Licence.

- (7) Imposition of Sales Tax, Octroi, and other levies by different States should be totally withdrawn on raw materials, Intermediates and Finished export products coming in and out of that State.

- (8) Reduction of Customs Duty on Embossing/Printing Rollers :

The Embossing/Printing Rollers used in the PVC Leather Cloth Industry attracts a high rate of Customs Duty. These Rollers are used to improve the quality and offer new designs in the international market.

It is, therefore, suggested that the Customs Duty on Printing/Embossing Rollers should be at par with the Customs Duty on Moulds & Dies used in the Plastic Industry.

I also urge that the Government should dispense with the 15% Foreign Travel Tax which is being charged on Foreign Exchange released for travel abroad atleast for exporters who are travelling to promote trade and earn more Foreign Exchange for the country in contrast to other passengers travelling for holiday or other purposes. Exporters should, therefore, justifiably be exempted from this tax.

It is felt that our Trade Missions abroad can also help us if we keep them posted with the latest information about the production and the items that India can offer. The commercial wings of these Missions may thereafter contact the importer in those countries and impress upon them that while importing the item from other countries they should try India also. If we are able to get additional market by such an exercise the country can earn a very substantial amount of Foreign Exchange additionally. I would urge upon my fellow members and the Secretariat to take initiative in the matter.

With these words, may I now request our Hon'ble Minister to distribute the Awards, and share his views.

Thank You.

- (6) Exporting Units should be totally automated.

PLEXCONCIL EXPORT AWARDS

Export Awards to Top and Second Best Exporters were instituted by PLEXCONCIL far back, in 1969, in order to emphasize and appreciate the export excellence of member exporters. They did help the exporters to meet the challenge in the export earnings, by not only giving their best performance, but also, by achieving their own goals in export market.

The norms for awards were revised, time and again, by the Award Sub-Committee of the Council, in order to introduce new Award Winners for New Products and also to New Markets.

While selecting the Award Winners, and the products for Award, the export excellence and the best performance are kept in view and the selection is done purely on Merit.

The Council presents Shields to the Top Exporters and a Certificate of Merit to the Second Best Exporters, in each product group.

At the 16th Export Award Function today, there are 50 Units receiving Top Exporter Awards and 35 Units receiving Certificates of Merit at the hands of Hon'ble Shri P. Chidambaram, Union Minister of State for Commerce, Government of India at Bombay.

Date : 11.12.1991

POLYESTER FILMS

Total Exports : 1989-90 - Rs. 1851.21 Lakhs; 1990-91 - Rs. 2478.75 Lakhs.
Major Export Markets - Australia, France, Italy, Indonesia, Singapore, Taiwan, Netherlands, Thailand, USA, UK

TOP EXPORT AWARD WINNER - 1989-90 and 1990-91

M/S. GARWARE PLASTICS & POLYESTER LIMITED,
50-A, Swami Nityanand Marg, Western Express Highway, Vile-Parle (East),
Bombay - 400057.
Tel : 634 6381 (4 Lines) • Telex 011-79084 GPPL IN
Fax : 634-8812 - 634-8813

"All that Glitters is not Gold", but "GARWARE". Polyester Film glitters all over the sophisticated markets in the world. Nearly 90% of the total exports of this product are done by Garware Plastics. Another feather added to their cap is that "GARWARE" are the Top Most Exporters of Plexconcil in the entire Plastics Group. They are also one of the founder members of the Council.

The hallmark of Garware's philosophy has been supply of high quality products and as a result, Garware enjoys an excellent reputation in the International market.

SECOND BEST EXPORT AWARD WINNER - 1989-90 and 1990-91

M/S. POLYPLEX CORPORATION LTD.,
75, Amrit Nagar, Second Floor, Behind N.D.S.E., Part-I, New Delhi - 110 003.
Tel. : 699207 (3 Lines) • Telex : 031-63380 - 031-63323

M/s. Polyplex Corporation Ltd., New Delhi, are the Second Best Award Winner of this Commodity. A very innovative and technically strong exporter of Polyester Films/Chips. Exports are mainly to specialised, competitive and new markets, such as Europe, USA and UK.

A very young but Dynamic Management, it has a continuous technology updating, research and development programme. The company maintains steady export growth and for the first time wins the Council's Award.

PLASTIC FLOOR COVERINGS (ALL SORTS)

Total Export : 1989-90 - Rs. 3227.36 Lakhs : 1990-91 - Rs. 4116.25 Lakhs
Major Export Markets - U.S.S.R.

TOP EXPORT AWARD WINNER - 1989-90

M/S. PREMIER VINYL FLOORING LTD.,

C-2, Commercial Centre,

Saidarjung Development area, New Delhi - 110 016.

Tel. : 66 00 23 - 66 83 09 - 66 10 87

Fax : 91-11-6862167. • Telex : 031-73100 BLKA-IN

A Government recognised export house, it has bagged the coveted Top Exporter Award for the first time from the Council. The makers of "WONDER FLOOR" Vinyl flooring and PVC Linoleums have captured the USSR Market. They have already diversified their export markets to GCA countries like Bangladesh, Malaysia, Middle East and African countries.

TOP EXPORT AWARD WINNER - 1990-91

M/S. ROYAL CUSHION VINYL PRODUCTS LTD.,

Ramkrupa, 25, Parekh Street, Prathana Samaj, Bombay 400 004.

Tel. : 35 24 97

Fax : (022) 389774.

• Telex : 011-76402 - MHDIT IN

A recognised Export House by Government of India, Royal Cushion, after doing spade work for years, have made a modest beginning now. With the recognition as the Top exporter, during 1990-91, their maiden attempt to win the Top Award for Plastic Floor Coverings has been successful.

SECOND BEST EXPORT AWARD WINNER - 1989-90

M/S. CAPRIHANS INDIA LIMITED,

Block D, Shivasagar Estate, Dr. Annie Besant Road, Worli, Bombay 400 018.

Tel. : 492 19 00/05

Fax : 91-22-494 1024.

• Telex : 011-76751 CIL IN
011-73769 CIL IN

The Second Best Export Award for 1989-90, is bagged by Caprihans India Ltd., a renowned name in export markets for Floor Coverings.

SECOND BEST EXPORT AWARD WINNER - 1990-91

M/S. PREMIER VINYL FLOORING LTD.,

C-2, Commercial Centre, Saidarjung Development Area, New Delhi 110 016.

Tel. : 66 00 23 - 66 83 09

Fax : 91-11-6862167.

• Telex : 031-73100 BLKA-IN

Though they topped the list during 1989-90 in the subcategory of vinyl floor coverings.

PLASTIC WOVEN SACKS/FABRICS/BAGS

Total Exports : 1989-90 - Rs. 1992.10 Lakhs; 1990-91 - Rs. 2065.08 Lakhs
Major Export Markets - Belgium, Canada, France, Germany, Greece, Ireland, Netherlands, Saudi Arabia, Spain, UAE, USA.

TOP EXPORT AWARD WINNER - 1989-90

M/S. GUJARAT POLYWEAVE LTD.,

25/32, Kala Bhavan, Mathew Road, Opera House, Bombay - 400 004.

Tel. : 811 42 62 - 811 02 38

• Telex : 011-75278 POLY-IN

An EOU Unit, it has done its best during 1989-90, and as a result, continues to win the Top Exporter Award for Woven Sacks.

TOP EXPORT AWARD WINNER - 1990-91

M/S. PAHARPUR PLASTICS,

8/1B, Diamond Harbour Road, Calcutta - 700 027.

Tel. : (033) 458956 - 494150

• Telex : 021-8068 PCTC IN - 021-8071

One of the successful companies of the Paharpur Groups and a Leading Manufacturer Exporter of Woven Sacks, M/s. Paharpur Plastics, is continuously earning international prestige for India through world wide markets. 25% of the total exports of this item are done by M/s. Paharpur Plastics. A remarkable performance and achievements. Woven Sacks Industry is expected to be doing well in future also.

SECOND BEST EXPORT AWARD WINNER - 1989-90 and 1990-91

M/S. KAMATH PACKAGING LIMITED

'Sharada' 1041-B, 80 Feet Road, IV Block, Rajajinagar, Bangalore - 560 010.

Tel. : 356546 - 351590
